

EndoFine[®] SI

NATURALLY OCCURRING SEED INOCULANT

GENERAL INFORMATION: EndoFine[®] SI is a naturally occurring inoculant that colonizes plant tissue and establishes a symbiotic relationship with plants AND A REDUCTION OF ENVIRONMENTAL STRESS. The organism in EndoFine[®] SI is present in all fields, but in insufficient numbers to effectively colonize all plants. The addition of EndoFine[®] SI re-establishes a normal relationship with plant roots, stems and leaves, thereby allowing for greater growth and yield potential. For irrigated fields, use non-chlorinated natural well water.

CONTAINS NON-PLANT FOOD INGREDIENTS

Ingredients:

Clonostachys rosea (2 x 10⁷ viable cfu/gram) 100%

NOT A PLANT FOOD INGREDIENT

Carefully read label directions

DATE OF MANUFACTURE:

Net Contents: 8.8 oz. (250 grams)

Lot # _____

EndoFine[®] SI

APPLICATIONS AND RATES

Inoculate seed using the following recommended rates. Contact supplier for information about mixing other active ingredients.

FOR ALL CROPS:

0.5 to 1 gram of EndoFine[®] SI per 2.2 lbs. seed

Example: for a seeding rate of 150 lb./acre use 34 to 68 grams (1.1 to 2.3 oz.) of product/acre. Adjust EndoFine[®] SI use rate according to seeding rates for various crops.

DIRECTIONS FOR USE

Seed Inoculation: Apply to dry product in drill box, auger application at recommended rates at time of seeding.

Important: Do not mix or use with liquid fertilizer! EndoFine[®] SI is compatible with Rhizobium and Penicillium based products.

EndoFine[®] SI will be viable on treated seed for more than two months if stored in cool conditions (35°F to 41°F). Do not apply with insecticides, fungicides, fumigants or pesticides, in general.
